Valley 21	D600008	CAG600008	COLUSA CO. W.D. #1 GRIMES	500	104	COMMUNITY	No	9210006	1/5/2009	Yes	Yes	9210006	1/5/2009	Not specified	Yes	Yes - but not maintained or tested	202016 - 24.0	6/9/2016 (PS) CWA is helping prepare a DWSRF planning application, but nothing has been submitted to date. The applicant is proposing to drill a new test well.	Investigating possibility of new wells or treatment	8/16/2016 - CWA submitted a completed feasibility study (FAST) application for treatment or a new well on 8/16/2016. 4/10/2016 - Funding application is nearly complete. 2/22/2016 - CWA states that a revised CWA is "NOT ADVISED, THEY HAVE NOT COMPLETED A FEASIBILITY STUDY NOR HAS IT STARTED YET [FOR NO FAULT OF THEIR OWN - IS DUE TO FUNDING SHORTAGE]. WATER PROJECT WILL COME FIRST BEFORE FEASIBILITY. 2016 MIGHT BE A GOOD DEADLINE FOR FEASIBILITY STUDY TO BE COMPLETED." 1/24/2016 - A funding application "kick off" meeting was held on 12-28-2016 to discuss necessary items that need to be covered to complete the application. John Wendel with CWA will be assisting the water system with the application. Project alternatives that were discussed were: test wells, pilot testing for adsorption media, coag / filtration if needed and possible coordination with Colusa Industrial Park.		
Centre Costa LPA-37	0707602	CAG707602	Seacon West	45	17	COMMUNITY	No	1000308	9/4/2009	Yes	Yes	1000308	9/4/2009	Dec-16	No	No	202016 - 27	Funding Approved for construction of a new well. 6/9/2016 (D) - The bids for the designed well came back twice as much as anticipated and designed for. Diablo WQ paid asked about using funding for other project alternatives, such as arsenic treatment or a consolidation/treatment of service project. Diablo WQ initially requested to cover a supplier cost of \$35,000 to assist any cost of flow, but they would not be able to cover a supplier cost of over \$35,000 to coordinate with drilling a new well. Additionally, there is no technical capability to support that adequate water quality and production would be encountered in a deeper aquifer. Diablo WQ does not know what project to move forward with, and will be submitting a request to allow the contractor to agree on that they can submit and move forward with a planning application. No claims have been submitted for this project.	See funding Status Notes - To Cost to drill three new wells was higher than anticipated and water system is evaluating potential consolidation with another public water system. Water system has conducted pilot testing and determined that treatment may be cost prohibitive. The water system is proposing to construct a new well at a shallow depth and has recently obtained grant funding for the construction of a new well.	8/3/16 - Water system is evaluating potential consolidation with another PWS. 6/24/2016: Construction will be able to complete by the end of the year. 4/20/16 - LPA Received New Well Project SRF 34C107 Plans and Specifications for Review. Water System is soliciting contract bids for well construction. 1/29/16 - LPA Received New Well Project SRF 34C107 Plans and Specifications for Review. Water System is soliciting contract bids.		
Centre Costa LPA-37	0707615	CAG707615	Doubletree Ranch HGA	49	18	COMMUNITY	No	0800252	10/31/2008	Yes	Yes	0800252	4/1/2016	17-Jul	No	Yes	202016 - 21.5	N/A	The water system has started pilot testing, however there were production problems with one of the two wells going dry. The water system has been focusing their efforts on restoring the water supply. The water system is currently evaluating the use of POE and POU treatment options. The water system is not seeking any funding assistance at this time.	4/29/2016: System was issued a new Compliance Order in April 2016. 3/7/2016: System will be issued new Compliance Order by the end of the month. 12/11/2015: The water system plans to complete pilot testing for POU alternatives by June 2016.		
El Dorado LPA-39	0900102	CAG900102	Gold Beach Park	100	50	COMMUNITY	No	0901548	11/9/2009	No	Yes		8/10/2015	11/1/2016			202015 - 12	Unknown	8/22/2016 "Do Not Drink" notices not required or filed in 2015 CCR. Issued Do Not Drink notices in annual CCR. Last voluntary survey was 8/2011.	8/2/15: issued a CCR on 8/10/2015, but they may still need to issue a violation with fines. 6/22/2016: Water system is not complying with compliance order that was issued 8/2015. Wendy update with LPA on 6/22/2016 to discuss the possibility of installing an over-served tank similar to the one at the school for tank use compliance. Not receiving any PN for the arsenic violation and don't believe they are issuing Do Not Drink notices. Last sample was collected on 12/6/2014 - 19 ug/L. 1/14/2016: Water system has been notified to test arsenic levels in a second well on the property. If the water system does not conduct water testing for arsenic on its own, El Dorado County (EDC) will complete water testing for arsenic levels for the second well on the property to see if it can be used as the main water source for Gold Beach Park. 12/4/2015: System is proposing blending from alternate sources to reduce arsenic levels below MCLs. EDC is waiting for water quality test results to determine if blending is a feasible option. Well#6 tested for arsenic levels on 2/10/2016. Arsenic levels in the possible alternate well were 2.6 ug/L. Gold Beach Park is now required to test Well #2 for other water quality constituents including organic chemicals, inorganic chemicals, secondary standards, etc. Testing results are still pending as of 4/15/2016.		
El Dorado LPA-39	0900210	CAG900210	Millers Hill School	120	2	NTNC	Yes	0900940	10/1/2008	Yes	Yes		12/31/2010	12/31/2010			302014 - 8.9	Pending funding Agreement Execution for Prop 84 construction grant	School applied for funding to drill a new well.	8/2016: Wendy and DE has been asking the LPA to have the school install the Well #4 and use it for drinking water. The LPA is still evaluating whether the school will be drinking the water from Well #4. 6/14/2016: cannot test (above 6.1 or less level for well #4 - 104.1 or below MCL) yet. 10/20/2016: Well #4 is the well that has arsenic values consistently above the arsenic MCL. However, Miller's Hill School has been providing bottled drinking water to students and staff since 2014. The latest CCR report states "All staff and students are drinking only bottled water provided by the school" and "Miller's Hill School has received Prop. 84 funding to replace the drinking water well and associated infrastructure". I called Miller's Hill School today and they are preparing a statement for me that details when the school switched to bottled drinking water. Miller's Hill School is still providing bottled drinking water for students and staff as of 4/15/2016. 12/9/2015: Per Gary Chan, the construction began in September. Recently, the Division of State Architecture (DSA) contacted the School District and requested to stop the work. It appeared the School District didn't get the approval from DSA when construction began, and DSA is requesting the Plans and other documents to conduct appropriate review. The School District's engineering consultant is preparing the documents for DSA review and requesting a timeline to see when the review is complete. 12/10/2015: School is currently providing bottled drinking water from an approved source for students and staff at the school. School has contracted with an engineering firm to locate and drill a new well. Funding is handled by the state; LPA does not know the status.		
Fresno-23	1000053	CA1000053	Lanare CSD	400	154	COMMUNITY	No	923296	5/18/2009	Yes	Yes	2009-923296	3/4/2009	Not Specified	Yes	No	202016 - (W4H 01) - 13 202016 - (W4H 02) - 15.3	P84 planning study completed 6/22/14. P84 FA received 9/24/15 for construction of 2 replacement wells. DFA has approved bid award on 1/11/16	Construct 2 replacement wells.	8/16/16 update: Both wells constructed but there are construction defects that are being addressed by the consultant with the well driller. One well has NO arsenic, the other 28 ug/L, based on a single sample during well development. Arsenic was not at vertical gradient and no positive specific capacity. If development does not result in reduced turbidity, wells may have to be redrilled. OLD UPDATES: 3/4/2016: Construction is under contract ordered rework and the court's monitoring progress toward compliance. Additionally, there are two construction projects underway to correct the arsenic MCL violation and provide a new distribution system. As such, issuance of another CO with compliance deadline is not deemed necessary by the DWSOB District Office. 8/24/16 P84 FA received for well construction. 1/12/16 update: DFA approved award of well construction bid. 5/4/16 update: one well constructed. the other underway. Adequate equipment by end 2016, well operator approved in Spring 2017.	Since the planning study was completed in 2014, and the construction funding award is approved, the PWS should have a revised compliance schedule with a different TC date.	YES
Fresno-23	1000071	CA1000071	Lakeview Improvement Assoc	64	160	COMMUNITY	No	1323008	12/31/2014	Yes	Yes	2015-1323011	3/26/2015	7/1/2017	No	No	202016 - (1000071-001) - 27.5 202016 - (1000071-002) - 19.3	Water system planning on self-funding solution	POU/POE (possibly)	8/16/16 update: System with recirculation flow issued 5/4/16. CAP submitted by WS on 6/22/16. Fines received on 6/22/16. WS is requesting re-evaluation of their PWS classification as a CWS (mostly seasonal usage record from). OLD UPDATES: Water system evaluating alternatives. NOT using state funding. 8/17/15 update: System consultant completed DSW on 8/28/15 regarding about POU pilot for compliance. Provided POU Guidance. 11/4/15 Sentinel advising WS of past due deadlines related to CAP substantial. 5/4/16 update: draft citation with recirculation firm prepared for failure to comply with Order.		
Fresno-23	1000072	CA1000072	Shower Lake Pt. No. 2	210	93	COMMUNITY	No	1223014	1/12/2015	No	Yes	2015-1223014	1/13/2015	12/31/2016	No	No	202016 - (1000072-001) - 4.5 202016 - (1000072-001) - 38 202016 - (1000072-001) - 28.5	Water system planning on self-funding solution	Centralized treatment or blending	8/16/16 update: WS continuing personal arsenic sampling study. 6/14/2016: Data is being obtained for Feb Q 2015. During 1st Q 2016, the operator found Wells 263 electrical controls had been damaged, and hence wells were inoperable. Samples could not be collected, and no MCL violation will be issued since the wells were inoperable. We have been advised that samples have been collected for the 2nd Q 2016, and results are pending. In Q2 2016 result for Well 1 was NO, potentially due to the pumping status of the well. Specifically, the operator is studying the possibility that the arsenic concentration reduces with pumping. Schedule: May - July 2016: Arsenic Sampling Study (filtering arsenic during pumping cycle to evaluate changes in concentration) August - Treatment design: pending results of study will install either a blending tank & controls or Arsenic Filtration Treatment. December 2016: Compliance via installation of equipment (treatment or blending tank) OLD UPDATES: Water system evaluating alternatives. NOT using state funding. 9/17/15 update: System procuring experienced engineering services to propose alternatives for centralized vs. POU treatment. 12/15/15 CAP presented at office meeting. DSW comments met to via letter dated 12/17/15. Proposal is to work with P84 Engineering Consulting to evaluate alternatives. 5/4/16 update: met with water system & consultant on 4/4/16 to discuss CAP compliance and proposals for evaluation of arsenic treatment. Water system is on a path to compliance.		
Fresno-23	1000369	CA1000369	Zanerwell Dairy	141	34	COMMUNITY	No	923602	7/29/2009	Yes	Yes	2009-923602	7/29/2009	Not Specified	Yes	Yes	202016 - (Cedar Well 17.8* 202016 - (Cedar Well - 5.1* *Indicates 2 quarters of POU NO results.	P84 Planning Study completed 12/31/15	POU installation using P84 planning study. POU installed & planning study phase complete 12/31/15	8/16/16 update: Results are NO for both POU devices. RTT estimated by end of 1st Q 2016. Domestic water supply permits used for POU July 2016. 6/14/2016: Results are NO for both POU devices so far. OLD UPDATES: 3 units have been installed and are in process of 1-year pilot study. 9/11/15 update: 1-year pilot study completed. DO awaiting pilot study report. 7/28/15 update: 3-unit pilot study report received pending. All POU devices will be installed upon DSW approval of the pilot study report, the water system will conduct required public hearing, then proceed with installation if approved by customers. Full installation anticipated to be completed by 12/15/15. RTT would be projected to occur by end of 1st Quarter 2016. Q2 2016: Well 01-31 ug/L, Well 02- 21 ug/L. 8/17/15 update: No Change 12/31/15 all POU devices installed and initial test completed. Will RTT when 4 QDMA shows compliance. 5/4/16 update: No change. POU installed, RTT pending QDMA compliance.

PBA construction project underway.	Construction of new well, blending treatment as needed	6/16/16 updates: Funding agreement executed 4/25/2016 to extend deadline for project completion to 3/31/18. Arsenic treatment: most to go to bid. 8/14/2016: the RTC date of 3/31/2018 is met in the 2009 compliance order. 5/12/15 updates: Pilot study completed and arsenic treatment underway. Design of treatment underway. 7/29/15 updates: Well 6 approved to operate with initial arsenic at 9 ug/L. Blending with existing high arsenic wells. As pilot completed & CDOW approved selection of treatment by letter dated 4/22/15. Design underway. Project FA provided deadline of 3/22/16 for completion. However CSO will be requesting extension. It is estimated that project will be completed and treatment online by September 2016. 9/17/15 updates: No Change. 11/16/15 phase 1 of construction project completed. 11/16/15 updates: FA extension request submitted by Cerritos CSO on 12/11/15 to provide 2 additional years to complete construction project. DFA is in process of issuing FA amendment. 5/4/16 updates: Funding agreement amendment A-1 executed 4/25/16 extending time to completion of project to 3/31/2018.	
Info: LPA-44	140036	CA140036	Kreder CSO	180	98	COMMUNITY	No	1100042	12/10/2010	Yes	Yes	1500013	3/2/2016	7/1/2018	No	Yes	2Q/2016 - 65	FA issued but KCSO Board has not signed agreement docs.	Public notification and PDU device	7/22/16: Kreder now has a 01 certified operator and is looking for a TL operator to hire. They are maintaining their PDU units and sending the LPA monthly reports. They now have 40 PDU devices installed out of 43 active service connections. PDU results are still NO. 4/22/16 New Board Members are addressing compliance order deadline. 1/26/2016: Approximately 40-50 PDU's installed out of 80 service connections. 0 service connection capacity met, not all lots are occupied. 3-5 samples are collected per month, so every unit is sample 1/yr. results are NO and no spikes have been detected due the county requiring the lotter to change out annually. problem is that the board didn't in December 2015 and so currently there is not certified operator. Funding agreement need a signature to be renewed and the board quarterly source sampling is still be conducted. PAs is being done quarterly. 11/20/2015-The SOA funding agreement was for centralized treatment alternative with costs research and drilling a test well to see if they can get a well with less arsenic. The KCSO Board failed to sign the agreement. Sen's office might have more info on where they are in the process and if they are still eligible for this funding package - probably not, because it's been several years now. Every PDU device is tested annually and results have been NO. Although they use the table PDU devices and media which have neither NSF 53 approved. The majority but not all homes have devices. Previous centralized treatment funding project for this system was rejected because the system could not afford to pay the high O&M costs for centralized treatment. Maybe they need another funding project that would install approved PDU devices at the homes that would allow it and then PDU on the service connections that won't allow a PDU. That way they have 100% compliance and approved devices. But don't know if we should wait for the new PDU/PDS regulations?? So we continue on with what we have right now. They distribute a quarterly public notice that states the arsenic violation info and where the water quality numbers are in the well, and the CSO shows both the raw well water data and the PDU data. System is currently collecting every PDU device annually spread out over the year.	
Visalia-12	1500378	CA1500378	Mahar Mutual Water Company	192	50	COMMUNITY	No	0919022	1/23/2009	Yes	Yes	9819011	5/26/2015	6/30/2018			2Q/2016 - 16	10/15: Was part of the Vaughn Regional Consolidation Funding project.	10/15: No longer considering consolidation with Vaughn due to funding offered was loan - which made the consolidation project unfeasible.	6/16: system given until 7/15/2016 to provide raw CAP since they will be not connecting with Vaughn for now. 10/15: Looking into possible blending with Brock MWW which exceeds release and is adjacent to Mahar. Both systems are under CO to fix problems - both just pulling out of the Vaughn Grants project due to loss of other grants. Systems did not get DAC status.	
Tehachapi-19	1500424	CA1500424	Land of Promise Mutual Water Association	130	65	COMMUNITY	No	0919019	1/23/2009	Yes	Yes	9719008	12/14/2015	5/30/2018	No	No	2Q/2016 - 17	Part of Rosamond CSO Regional Consolidation PBA/SPR Planning Project.	06/03/16 (SD): Consolidation with Rosamond CSO plus other alternatives to be evaluated now. 04/28/16 (SD): Based on recent discussions in 2016 with KCSO, other alternatives may be also need to be explored before proceeding to consolidation. KCSO has approved contract over the Q & M cost for the long consolidation pipeline.	06/03/16 (SD): During phase 1 of the KCSO's regional consolidation project (expected to start in 2017), other alternatives (new well, treatment, etc.) including consolidation will be evaluated to select an alternative for construction. KCSO has expressed concerns over the Q & M cost of the long consolidation pipeline to limits of feasibility. 6/10/2016 (NS): KCSO will be consulting with Kern County's legal counsel about funding agreement terms and conditions. They continue to have liability concerns and it is unclear how long the negotiations will take. County is a third party to the project and is only acting as a mediator to ensure grant funds. County does not own or operate the water system. RTC date is satisfied. 06/28/16 (SD): The State Board now plans to issue a funding agreement to Kern County to establish the PBA funding project. 04/28/16 (SD): Review of test plans and specs are final since they are incomplete. Draft PDBA was approved by letter dated December 1, 2015. Test Well Completion report was approved by letter dated April 13, 2016. Amendment to Funding Agreement to extend the planning project completion date to December 31, 2016. Issued to Rosamond CSO on April 25, 2016; waiting for KCSO to return the signed amendment to the State Board. 04/16 (SD): Draft plans and specs for the consolidation project received on Dec. 31, 2015; the District office plans to complete review of the plans by early February 2016. Project time extension to July 2016 is under consideration by DFA. 10/05/15 (SD): Rosamond CSO has completed drilling of a test well to address its hexavalent chromium problem; we're quality results of the test well are awaited. Draft PDB of the design of consolidation pipeline of retail system has been received and is under review by the CDOW. Deadline for completion of the planning project is January 22, 2016. 8/04/15 (SD): Test well to be drilled by Rosamond CSO to address hexavalent chromium problem; bids already received for the test well. Surveying work of consolidation pipeline in progress. 5/29/15 (SD): No changes from the last comments from 2/13/15. 2/13/15 (SD): Planning project target completion date January 22, 2016, per Nov. 2014 amendment to funding agreement.	
Tehachapi-19	1500426	CA1500426	Rose Villa Apartments	47	32	COMMUNITY	No	0919021	1/23/2009	Yes	Yes	919021	1/23/2009	No specified date	No	No	2Q/2016 - 10		Consolidation with Rosamond CSO	06/03/16 (SD): Per email communication in July 2016 with GE consultants, draft plans and specs are under preparation and will be soon submitted to CDOW for review. Project completion deadline is 12/31/16 for the PBA planning process. 04/22/16 (SD): Technical drawings and specs are being done they are incomplete. Draft PDBA was approved by letter dated December 1, 2015. Test Well Completion report was approved by letter dated April 13, 2016. Amendment to Funding Agreement to extend the planning project completion date to December 31, 2016. Issued to Rosamond CSO on April 25, 2016; waiting for KCSO to return the signed amendment to the State Board. 04/28/16 (SD): Draft plans and specs for the consolidation project received on Dec. 31, 2015; the District office plans to complete review of the plans by early February 2016. Project time extension to July 2016 is under consideration by DFA. 10/05/15 (SD): Rosamond CSO has completed drilling of a test well to address its hexavalent chromium problem; water quality results of the test well are awaited. Draft PDB of the design of consolidation pipeline of retail system has been received and is under review by the CDOW. Deadline for completion of the planning project is January 22, 2016. Part of Rosamond CSO Regional Consolidation PBA/SPR Planning Project. 8/04/15 (SD): Test well to be drilled by Rosamond CSO to address hexavalent chromium problem; bids already received for the test well. Surveying work of consolidation pipeline in progress. 5/29/15 (SD): No changes from the last comments from 2/13/15. 2/13/15 (SD): Planning project target completion date January 22, 2016, per Nov. 2014 amendment to funding agreement.	Upon completion of the Planning Project, a revised compliance order should be issued.

Tahachapi-19	1500436	CA1500436	Hungry Gulch Water System	33	16	COMMUNITY	No		0919015	1/23/2009	Yes	Yes		9619003	4/29/2015	4/30/2018	No	No	2Q/2016 - 77	05/03/15 (USD): BLM has recently given approval to drill the test wells; the wells are expected to be drilled by the end of 8/1 year and target is to complete the P84 planning project by April 16, 2017. 04/28/16 (USD): NWS and Hungry Gulch are working with BLM to require easement to drill test wells; application has been submitted to BLM. Funding agreement has been amended to extend the completion deadline to April 16, 2017. 03/02/16 (USD): Due to excessive cost of purchasing the land from the private property owner and not having the option of buying the easement, CPA and DOW support NPS to purchase the option. DOW is in contact with BLM to check if BLM would allow to drill on its land and the document is in the process of being finalized and is expected to be available by the end of February 2016. Current P84 funding agreement expired on 12/31/2015; CPA will consider extending the funding agreement if there is a solid option to purchase. 10/09/15 (USD): NWS Engineer is negotiating with the property owner to ensure the easement and develop an easement agreement for the proposed test well. If an agreement with the property owner is not developed soon and a test well can not be drilled, the P84 feasibility project may need to be ended since the current project completion date can not be extended beyond December 31, 2015. The water system may then need to submit a new NPSST funding application using FARM. 5/29/15 (USD): Funding agreement of Hungry Gulch MWC P84 planning project amended on 2/20/15 to extend completion deadline to June 30, 2016. P84 planning project in progress with a completion deadline of February 13, 2015. Funding agreement is being amended to extend completion date to December 31, 2015.	Drilling a new well and POU/POE will be evaluated if well drilling option is unsuccessful due to suitable land not available. Consolidation of Boulder Canyon with Hungry Gulch MWC	06/03/16 (USD): Same updates as Column B (Funding Status) of this spreadsheet. 04/28/16 (USD): NWS and Hungry Gulch are working with BLM to require easement to drill test wells; application has been submitted to BLM. Funding agreement has been amended to extend the completion deadline to April 16, 2017. 02/24/16 (USD): CPA is in the process of amending the P84 planning funding agreement by 12 months in view of the progress made by meeting with BLM for easement of land for drilling test wells and starting the BLM application process. It is expected that an amendment will be executed in April 2016 with a project completion deadline of April 2017. Once the planning project is complete, the water system will apply for construction funding and we anticipate meeting the compliance deadline of 12/31/16 (USD). P84 planning agreement expected to 12/31/16 and will be amended once there is a clear option to proceed. 10/09/15 (USD): Discussions with CPA were held in July and August 2015 to explore the feasibility of interim solution, such as providing bottled water or water vending machine. It was determined that due to various logistic reasons, implementation of these solutions would not be possible. 7/22/15 (WKC): Tourmalin TP will be pursuing bottled water immediately, as it is beginning to work with our funding group on the paperwork. 5/29/15 (USD): Location for drilling a new test well has been identified near the service area of the Fourth Street Water Company; plans & specs for the test well are being prepared to go to bid. 2/13/15 (USD): First test well drilled was not successful due to high arsenic and uranium. Engineer looking for a second test well site near the service area of Fourth Street Water Company in hopes of finding low arsenic water.

The LPA is in the process to have a conference call with Lawrence with DPA (per Kurt's suggestion) to discuss funding for treatment. 2015: No funding project at this time. The operator was provided the application and the contact information for Lawrence Sanchez, Associate Sanitary Engineer, to initiate the process.		
Hollywood-07	1510246	CA1510246	Land Projects Mutual Water Company	1500	539	COMMUNITY	No		507052	1/6/2009	No	Yes		7/29/2015	9/1/2016	No	No	2Q/2016 - 12.5 (Well 1) 2Q/2016 - 10.82 (Well 8)	2Q/2016 - 14.5 (Well 1)	N/A	PN and quarterly monitoring required. Well 1 is in the 4B-CO (2014). It was back in violation of arsenic MCL. The Company is planning to further reduce Well 8's production from 600 gpm to 400 gpm, hoping to lower arsenic concentrations. Well 7 is non-permitted well, still waiting for SC Edison to hook up the power. Initial arsenic sampling showed the concentration was at 7.5 ug/L. It is too early to discuss its arsenic compliance. April 18, 2016: Well 8 was out of compliance with arsenic MCL in the first quarter of 2016. January 11, 2016: Well 8 was out of compliance with arsenic MCL in the fourth quarter of 2015. The Company will take another arsenic sample for Well 8 in January 12, 2016 to confirm the fourth quarter's result of 21 ug/L. The new Well 1 is drilled, however, it is still waiting for SC to install new power line. 3/14/2015: the drilling of a new well, Well 7, is in progress. Enforcement History: May 23, 2008: Notice of Violation issued for violating Federal Arsenic MCL. January 6, 2009: Compliance Order issued for violating arsenic MCL (FA Compliance Order did not meet EPA's formal notice criteria). April 18, 2012: Citation issued for failing to comply with arsenic MCL and following through with funding gap. The Compliance Order directive: February 2, 2015: Issued Compliance Order for violating the arsenic MCL (FA Compliance Order contains a RTC date). Current Plan: The Company modified Well 8 casing perforations and reduced its pumping rate from 1500 gpm to 600 gpm; this has recently brought Well 8 back into compliance. The Company plans to drill two new wells to replace Wells 1 and 8. It is hoped that the two new wells can tap into water with low concentrations of arsenic.	7/25/2016: No status change from previous update. 6/11/2016: Well 8's latest arsenic concentrations was at 10 ug/L and 10.7 ug/L. The Company is planning to further reduce Well 8's production from 600 gpm to 400 gpm, hoping to lower arsenic concentrations. Well 7 is non-permitted well, still waiting for SC Edison to hook up the power. Initial arsenic sampling showed the concentration was at 7.5 ug/L. It is too early to discuss its arsenic compliance. April 18, 2016: Well 8 was out of compliance with arsenic MCL in the first quarter of 2016. January 11, 2016: Well 8 was out of compliance with arsenic MCL in the fourth quarter of 2015. The Company will take another arsenic sample for Well 8 in January 12, 2016 to confirm the fourth quarter's result of 21 ug/L. The new Well 1 is drilled, however, it is still waiting for SC to install new power line. 3/14/2015: the drilling of a new well, Well 7, is in progress. Enforcement History: May 23, 2008: Notice of Violation issued for violating Federal Arsenic MCL. Possible Treatment/Consolidation. Planning in Progress	8/3/2016 There has been no updates on the water system. 6/23/2015: District Engineer has notified the School that they could apply for bottled water but liability won't pass until because they know that the long term solution is in the works. 4/28/2016: No status change from previous update. 3/10/2016: The system is consolidating with MDES North Fork water system. Madera County Environmental Health Division can suggest the school provide bottle waters to all staff and students. However, the school needs to update their Planning Agreement as their previous Planning Agreement expired. A new request has been sent to their contact Fred Fayall. 12/8/2015-DA contacted DE for DPA update. A meeting was held to discuss consolidation with MDES North Fork Water system.
Madera UPA-50	2000619	CA2000619	Cold Spring Granite	43	10	N/TNC	No	CC0000729	8/25/2009	Yes	Yes	CC0002571	ACTUALLY NOT YET MAILED OUT BECAUSE THEY DID SEND A NEW WELL BACK INTO COMPLIANCE AND NOW WELLS SAMPLE RESULTS ARE DEFECTED THIS WITH D.D. NOT ISSUED FOR SRF BECAUSE NEW RESULTS MAY ELIMINATE THE NEED. SOURCE IS INACTIVE AS OF JAN 2016. Compliance Order is active because water system decided to keep wells active.	6/30/2018	No	No	2Q/2016 - 11 Well 1	FOR PRIORITY SRF NOT APPLICABLE	In 2009 conceptual plan system was to provide bottled water and research remediation of well exceeding the arsenic MCL.	8/3/2016 Compliance Order is active because water system decided to keep wells active. Public Notification Provided. Change of Operator. In contact with new operator and he has filed someone to prepare a conceptual plan for obtaining compliance. 4-28-2016 1Q/2016 16 OVER THE MCL 100A NEW COMPLIANCE ORDER TO BE ISSUED FOR WELL 1. 1-15-2016 Well 1 has been deactivated from the water system. The new well was supposed to bring the system back into compliance however the New Well 3 hypothetically best case scenario for the RAA is 104 ug/l, even if the next quarterly Arsenic sample is 0 ug/l. So far results are as follows: 1Q/2015 5.6 ug/l, 2Q/2015 17.402016 15

Lassen -02	3230911	CA2210911	Plumas Eureka CSD	338	546	CWS	No	902093	2/26/2009	Yes	Yes	9502913	2/19/2016	11/1/2017	No	No	2Q/2016 - 10-4 (At Compliance Sampling Point located downstream of a storage reservoir)	<p>DPA Planning team application submitted 2/15/2016. 6/9/16: A DPA project manager was assigned to the project on 4/6/16. The submittal application is currently under review and very close to being complete. DPA plans to fund a planning project that will design an erosion removal system and improvements to W016 US & Wall 2. Currently we are waiting for a bid from the County. We are in the process of review and hope to execute the planning/bidding agreement next 6 to 8 months depending on community response time.</p> <p>Updated 2/11/15)</p> <p>Received District's "Proposed Project Update" on 2/26/15. District proposes to construct a small arsenic treatment plant (100-150 gpm) at a total cost estimate is \$3.3M.</p> <p>4/18/2016 - Met with the District board three times during the months from October 2015 to February 2016 to discuss the tentative proposal and timeline for compliance. The submitted PDS did not describe adequate alternative analyses that included an interim with a local community and the issues that may have been important to the proposed project of arsenic treatment, such as easements and rights-of-way.</p> <p>9/21/15 - Lassen District Staff met with system and consultants. Some of pilot test data did not look like it applied to the system well. Looks like they won't meet 11/1/16 deadline. The system has submitted a proposal for additional pilot testing but it would not be completed until March of 2016. Preliminary estimate for a treatment plant is \$3M. In its evaluation of alternatives the system did not do a thorough evaluation of consolidation. A nearby 1 mile previously owned water system, (Grangeville Water Company) with supply that meets standards that could be used to blend with high arsenic water. Reevaluation of possibilities by November 1, 2015. This appears to be the more cost effective project but an evaluation needs to be done. Estimate for treatment is \$3M.</p> <p>7/1/2015 - The District Board will vote at their next meeting to approve its engineer to design the wellhead treatment system and authorize the District Manager to act as the District representative to apply for SRF funding. The District is on track to meet its 11/1/2016 compliance deadline.</p>

The operators met with EHS in September 2015 to discuss barge disposal options and were referred to the RWQCB for guidance. 12/1/2015: The water system is working with Tekatch to provide a RC treatment unit. The operators met with EHS in September 2015 to discuss barge disposal options and were referred to the RWQCB for guidance. 6/2015-RTC depends on funding availability.	
San Bernardino LPA-66	3600062	CA9600062	Culiver Water System	100	10	NTNC	No		1200026	9/17/2012	No	No	CC0000196	7/10/2015	12/31/2016	No	No	2Q/2016-48		Two 2 modifications	6/24/2016: LPA approved the arsenic water treatment plans. System is in the process of being installed. 5/6/2015: EHS is reviewing plans submitted by the water system for an Arsenic arsenic treatment unit. EHS is reviewing plans submitted by the water system for an Arsenic arsenic treatment unit. 11/2015: Treatment unit plans were submitted to EHS for review.	
San Bernardino LPA-66	3600156	CA9600156	CSA 70 W-4 Plovertown	410	124	COMMUNITY	No		1200014	7/16/2001	Yes	Yes	CC0000014					3Q/2016-112.5	Prop 84 planning project funding agreement form signed. Project is pending completion certification.	Two 2 modifications: Consolidation with High Desert Water District in Yucca Valley (depends on funding availability)	6/24/2016: Had a meeting on 5/22 with water system to discuss compliance plan. The water system is to meet with HS District regarding schedule on back up to primary well. 5/6/2016: Design complete for interconnection with High Desert Water District. Awaiting prop 84 construction funds. 5/5/2016: Issued NOV on 3/29/2016 and now are now in negotiations with the county. Fluvius and Uranium were also added as consultants that were above the CAA/MS and were included as information only since the Fed EPA cannot enforce them. 3/6/2016: COW has requested that EPA is send a compliance order. 2/16/2016: DE followed up with San Bernardino County Special Districts, who operates the water system, about providing bottled water, and they discussed about applying through FAST for the interim CAA emergency funds. The CSD have not been directed by the LPA to provide bottled water, so the DE gets the feeling they are hesitant to do so. The DE will keep the discussion going. There is a resolution to this in the works. Last year they completed a Phase II planning project to design a water pipeline to the nearest WS, and DFA is reviewing their construction application now. They are hoping to get the Phase II application and start construction this summer. The DE don't think he had a project where DFA was keeping the district office out of the loop, but this is one. He learned from DFA on Tuesday this week that they had a kickoff meeting with the system in November and have been in contact with them on changes to the plans and specs that were approved last year. DFA said they will keep the DE updated on the new documents to be submitted. 12/1/2015: Design complete for interconnection with High Desert Water District. Awaiting prop 84 construction funds. 6/2015-RTC depends on funding availability.

Need to confirm with July monthly report (due by 8/1/16) if RC 6/24/16 - WTP is operational and WSP is beginning compliance sampling. Permit is on schedule to be issued by end of June. 4/29/16 - WTP is operational and in commissioning phase, permit to be issued by June. 1/29/16 - Start-up testing is underway, WTP should be online and permitted by May 2016. 11/2/2015: Status in the same as 10/2/2015 update. 10/2/15 - Start-up testing and commissioning of CDR treatment plant is underway.		
San Diego LPA-67	3701010	CA9701010	Warner Unified School District	250	15	NTNC	Yes		1506055	2/4/2015	No	Yes	1606136	3/10/2016	3/1/2017	Yes	No	3Q/2016 - 10.6	Assistance referral request was made May 21, 2012. Application received and deemed complete. Request to DFA regarding status of processing application made by DE June 2015. 6-10-15 (1/16): They have applied through SAGU for interim Emergency Drinking Water and brought before Working Water Funding Program and is currently being reviewed. Apply end of May 2016	Drill new well for blending, or arsenic removal treatment	6/15/2016: Application for Clean-up and Abatement funds for Arsenic reduction was submitted in May 2016. Mark Magallon of DFA indicated the application would not be considered since the engineering design from NPS included a ROD for the classroom building and new RODs in other schools with an Arsenic exemption. A conference call between NPS, CROW technical assistance provider, Mark Magallon of DFA, DFA Certified water operator, Warner School representative and DE happened in 6/2016 and addressed how to move forward. Engineer NPS was to investigate the ROD used at another school in the State and report back to the group. All documents have been submitted to Brenda Pelt of DFA to complete the application for funding for the long term solution. Application is under review and will take several months as Brenda Pelt. 11/20/2015: The LPA had a conference call with Warner School before, Kyla Brendt, Sean, Corrie, Noel and the school were present. There are two items missing from the application to make it complete: <ul style="list-style-type: none">Authorizing ResolutionSchedule of System Obligations The school board meets next on December 8th, at which time these items can be addressed. In the meantime the school will complete a Prop 84 application to request funds for bottled drinking water for staff. The LPA is planning on visiting the site while the students are on winter break. At that time, or shortly after their visit, they will issue a revised Compliance Order that meets the approved State requirements. They will work with the DE or COW staff to ensure that it meets all of the criteria needed to be a formal IA. 4/2015: The water system has two separate distribution systems. Well 1 is located next to Highway 78 and serves a high school, elementary school, bus maintenance building, office and residences. Well 4 and 5 are located west of Highway 78 and serve a resource center, concession stand, ball fields and continuing education classrooms. 9/2/2016: Revised Citation issued 9/10/2016. School is seeking Clean up and Abatement funds for reimbursement of bottled water that is provided at the school. The school is requesting technical assistance from Beldora Carral with CROW to complete the application, which will include a request for the installation of a ROD at the kitchen. The school is working with Brenda Pelt of DFA for a long term solution.

Project in progress, expected to complete by 11/1/2015.	SWRCB working with Eng and Stockton to connect to WS	6/13/16: This is State funded project and San Joaquin County Public Work Department is working on the plan for the new water line installation. Once the County approves the water line extension, the City of Stockton will start the connection process. 12/1/16: CROWA is continuing to work with city and water system towards making a connection using SWRCB funds. 11/19/2015: As this is a state funding project, the LPA has no idea on the RTC date. LPA do not yet have compliance order with new RTC dates this is a funded state project. 11/2/2015: Julia Martinez of Cal Rural Water is working with City of Stockton for funding agreement to make a connection to MHP. Engineering Plans approved by County and City in March 2015. City to file for funding agreement w/ state in 60 days.	
San Joaquin LPA-69	3901169	CA9901169	MS/D-NILE GARDEN SCHOOL	804	3	NTNC	YES		701688	10/27/2007	Yes	Yes	1202511	7/1/2012	12/1/16-in State's Funding Program Processes			1Q/2016 - 23 2Q/2016 - 23	Awarded Prop 84 feasibility study grant on 11/28/2012. Project in progress, expected to complete by 11/28/2015. 6/10/2016: NGS-PSA feasibility study was completed on 4/25/16. The City is preparing the COW documents and WSPAR construction application. Bottled water is not being supplied from PSA TOSCI program, but we will reach out to the school district to see if they are interested.	Applied for Prop. 84 and SRF funding.	6/13/2016: This is a State funded project and CROWA is working with the water system and San Joaquin County (LPA) university of the state. 2/22/2016: Reid Johnson of "Note Vertical" is the consultant working on this project. This is a SF funding project that provides money to the City of Manteca to install a new source and to make a connection to this school through an Emergency use of Service area. 1/1/16: Consultant, Reid Johnson, is continuing to work with water system and city to make this connection using SWRCB funds. 11/19/2015: As this is a state funding project, the LPA has no idea on the RTC date, and the LPA doesn't yet have compliance order with new RTC date when they are being funded. 11/2/2015: LAFCO approved out of service area connection. City working with CROWA for making a connection to the school. 3/31/15: Sent email to School, Engineer, City PW and State for update on progress to connect to city. No one at City or State knew where this funding project is. 2/1/2016: applying for LAFCO out of service area connection.	
San Joaquin LPA-69	3901213	CA9901213	AVAILS, SILVA	80	15	COMMUNITY	No		0801685	8/28/2008	Yes	Yes	1202512	7/1/2012	Depends on Century MHP Compliance Date	Y		1Q/2016 - 13 2Q/2016 - 13	NO: SRF application submitted 2008 was for extreme hot arsenic. Waiting on Century MHP SRF approval for city connection. This system can make a connection to city water off of new line to Century MHP.	Waiting for Century MHP to be served by city for system to make a connection. Notified owner to apply for funding with State to make a connection to city of Stockton on April 2, 2015.	6/13/2016: This is a State funded project. Yes, bottled water is provided by Avo Pure Water Company. The new well was drilled and installed on 10/20/2015. 11/1/16: Julia Martinez of CROWA is continuing to work with the water system to obtain the proper paperwork for SWRCB funding to make a connection with the City of Stockton. 10/2/2015: System lacks money. Public Notification 11/2/2015: Julia Martinez of Cal Rural Water contacted Silva regarding needed documentation. Silva has not yet been able to locate anything for the deed, but she has not yet sent it to me. Silva gave permission to contact her lab and Quality Services, Inc. for additional information. A scheduled site visit for Nov. 3rd will be made. Pursuing the connection to City of Stockton.	
San Joaquin LPA-69	3901314	CA9901314	B) COMPANY LLC						901865	6/19/2009	Yes	Yes	1202514	7/1/2012				1Q/2016 - 17 2Q/2016 - 17	4/27/2016: Encroachment Permit has been submitted pending for approval to install a 12" water line extension per Haley Contracting. 2016: Waiting to reallow much lined Cal Trans will take when Hwy 99 clover leaf is constructed. Will connect to wall but meet standards, if they will still be in business. Well collapsed. The Water System has a Will Serve letter from California Water Services to provide water to the parcel. They are currently going to Cal Trans for a permit to punch up Cal Trans road to install the new water line. This connection should be accomplished by March 2016.		6/13/2016: Confronted the record record of connections to San Joaquin County Public Work Department pending for approval to install a 12" water main extension. If not finished by the end of this year, a new order will be issued with a new RTC date. 11/1/2016: On 9/15/15 the LPA was made aware that the new source well for pooling more connections may be beneficial. 12/1/2015: County will really can't coordinate with any local system - they are still looking at the POU option. There is a large adjacent parcel which is trying to split into 22 lots. This parcel has one well (with permit) but they might be willing to share money at County Hills and then perhaps they can all have a treatment plant installed. Very political. 6/2015: Out to bid for POU.

EPA Comments/Questions
Pilot study is completed? When does this systems expect to RTC? Candidate for compliance order if anticipated RTC date is past Dec 2016.
Due to lack of a formal order, high arsenic level and the fact that not all homes have POU's, system appears to be a candidate for compliance order.
What date was the compliance order issued?
Order was issued 6/18/15 but Column K states that the order does not meet EPA criteria? If this actually is the case, a revised order meeting EPA criteria is needed.
Need clarification on when all Sacramento orders will be issued or whether they have been issued already.
Applied for funding to complete what type of project? How has the consolidation project played a role?
All San Bernardino systems have orders with short RTC turnaround. How recent are all of the RAAs? What are the proposed solutions for the PWSs? All possible candidates for new compliance orders if not expected to RTC by end of 2016

RTC date needs to be updated. Especially since project was expected to be complete by Nov 2015. If project is not expected to be completed by date stated, then may need amended order.
RTC date needs to be updated. Especially since project was expected to be complete by Nov 2015. If project is not expected to be completed by date stated, then may need amended order.
Candidate for revised order and RTC date.
ENF: Candidate for new compliance order only if plant is not functional. Also, please include milestones such as when planning study complete, etc. DATA: If data from treatment plant ends up being below MCL, does system still plan to seek funding?
Given anticipated RTC date, a compliance order should be issued.
Need anticipated RTC date. If still extends into 2017, a compliance order should be issued.
Should this system be moved to the RTC list in respect to arsenic noncompliance?
Please provide more information on consolidation. Candidate for revised order.
Provide latest RAA and anticipated RTC. Depending on anticipated RTC date, EPA may want to see a compliance order issued.
Due to the long period of time before returning to compliance, this system remains a candidate for a compliance order. A compliance order will not be issued due to the political nature of this water systems.

	Yes	No	SRF construction project for consolidation with Lost Hills Utilities District in progress

could participate in East Niles regional project	blending well 2 and 3; already rehab well 3; waiting for test pumping and results
Well 01 is in violation of the arsenic MCL, RAA 0.028 mg/L	Proposal to provide POE arsenic removal treatment
Well 01 is in violation of the arsenic MCL, 3rd qtr. 2014 RAA 0.020 mg/L	Consolidation with Lost Hills Utility District
	Too far away from City of Bakersfield for consolidation
Well 02 is in violation of the arsenic MCL, RAA 0.013 mg/L	Considering arsenic removal treatment.

3/7/2016: We have 5 quarters of sampling from well that exceeded the arsenic MCL indicating the well has dropped below the MCL. In addition, the system has been blending the two sources of supply in a storage tank before going to customers. The system has not been permitted for the blending, but the District will be working on a permit amendment for the blending treatment and require monthly treated sampling from the blending compliance point. 10/15-AR with Self Help working on submitting FFAST application for consolidation with East Niles. Well 3 went dry due drought so blending no longer an option	Yes

<p>Construction FA issued for treatment at Garzoli Well</p>	<p>Installing arsenic treatment plant- Adsorptive media</p>

	YES
	Yes
	Yes
<p>2/8/16- (TW): System has awarded contract for \$3.6 Mill. construction of arsenic treatment plant and storage tank. They did not use well from approximately 6/13 to 12/15. Used the well in early 2013 to pilot different media. Current RAA = 8.1 ppb. However, well only turned on to collect sample so - low sample results may be due to the well not being used and not representative of the arsenic level typically produced by the well when in use.. Construction bid awarded for \$3.3 Million with construction 12-18 months. System instructed to take 1st quarter 2016 arsenic sample-if below the MCL, the system may be returned to compliance. current CO dated 5/8/12 - directs them to minimized the use of the Garzoli well in the system. 11/15/2015- (TW): System going out to bid. Estimated construction 12-18 months. This system was not selected for a revised CO due to the timeframe of RTC. It does not fluctuate much as the range is typically 11-14 ppb. They have not been using the well (2013 and 14) as they did not need it however, they recently did need to start using again due to the capacity in the system. They were using the well in early 2013 for piloting of different media. They have recent results below the MCL, however, the well was not being used in the system and only turned on to collect sample. We believe the samples below the MCL are due to the well not being used and not representative of the arsenic level typically produced by the well when in use.. 8/4/2015 (TW): Construction application has been received and waiting for the Construction FA to go out to bid. Estimated FA issued Fall 2015 with Construction 12-18 months. This system was not selected for a revised CO due to the timeframe of RTC. It does not fluctuate much as the range is typically 11-14 ppb. They have not been using the well (2013 and 14) as they did not need it however, they recently did need to start using again due to the capacity in the system. They were using the well in early 2013 for piloting of different media. They have recent results below the MCL, however, the well was not being used in the system and only turned on to collect sample. We believe the samples below the MCL are due to the well not being used and not representative of the arsenic level typically produced by the well when in use.</p>	Yes

	<p>The well has been reconstructed in an attempt to meet the As MCL. However, this was not effective. The water system has been pursuing consolidation with another nearby public water system, but has not yet been successful.</p>
No SRF application	<p>This well will be converted to emergency standby source.</p>
	<p>2/18/2016. Filtering system was installed. First sampling results submitted on 3/16/2016. Results were non detect. A three month sampling to be conducted to evaluate proper function of sytem.</p> <p>2/18/2016: Plans for filtering system were approved. Installation will take place 2/29/2016. 1/15/2016: Plans for a filtering treatment submitted. Original compliance plan submitted to LPA September 30th, 2010. Compliance plan was changed in 2014 to blending plan. Proposed solution was a blending plan which was approved by District Engineer and LPA 7/17/2015. Some efforts were made to implement plan, but was not implemented. On 10/23/2015 representative informed DEH that they will be looking into a filtering system. Plans will be submitted within the next week. 7/26/2016 Filtering system was installed. The system appears to be working. Last two quarters have been ND. The RAA is below the MCL. Returned to compliance on 7/27/16.</p>

	Yes
	Yes
<p>4/18/2016. Filtering treatment system has been installed, Two consecutive sampling sets a week a part were reported non- detect. sampling for 4 initial weeks and then monthly. DE required the running annual average of treatment to meet requirements before the system is returned to compliance. 1/15/2016: after evaluating levels of uranium and arsenic, operators decided to install a filtering system instead. The filtering system gave them more confidence to reach compliance. 2015: Tier 2 arsenic notifications issued quarterly. Well is sampled for arsenic quarterly. State engineer and LPA visited site in January 2015 to evaluate blending plan. Blending plan was approved, but system decided not to implement. System will be submitting plans for a filtering system with in one week. 7/26/2016 Filtering system was installed. The system appears to be working last two quarters have been ND. DE requested 4 to be below 10 before RTC. 7/26/2016 Filtering system was installed. The system appears to be working. Last two quarters have been ND. The RAA is below the MCL. Returned to compliance on 7/27/16.</p>	Yes

ON ASSISTANCE REFERRAL LIST I THINK	New owners. Revisiting permanent source of blend or consolidation.
	Wrote violation letter. Response by system was to take well out of service and place in standby status.
Funding project nearing completion. Arsenic treatment plant has been online since September 2014. Treated water meets the arsenic standard.	PN required, existing treatment plant was re-engineered and construction was completed in September 2014.

<p>3/3/2016- DEs is positive Bella Vista has connected to Paso Robles Beach MWC. The water system needs to sign the declaration form saying they are no longer a water system and state the reason as they've connected to a permitted public water system, which should be named specifically. A letter was also sent a letter to the Paso Beach operator asking for documentation. Once we receive those documents, we will add it to the RTC list. 12/2015-Bella Vista is no longer blending, they are 100% purchasing water from Paso Beach. LPA has not seen the final contract so until they do, they don't want to inactivate the system. Kurt Souza says they are RTC because the water deal is going to happen. 6/2015-Hook up in progress to local CSA - Kurt S. advised to take of list. Until then they are blending.</p>	Yes
	Yes
<p>8/3/2015 (JD): PWS had their treatment on-line starting in September 2014. So the plant effluent is <10ppb but the RAA was > MCL as of the 1st quarter 2015. It is anticipated that after the 3rd qtr 2015 the RAA is < MCL.</p>	Yes

3/21/2016	Connection to Paso Beach water co., wells disconnected from domestic system.
